

Reselling a Previously Certified Vehicle

Oftentimes, a retailer acquires a vehicle that was previously sold as Certified (either through a trade-in or an auction). This unit is still Certified. The certification warranty stays with the vehicle until it expires either through time or mileage.

Previous Sale Date	Coverage*
Up to January 3, 2013	6 years/100,000 miles
January 4, 2013 – October 31, 2018	7 years/100,000 miles
Beginning November 1, 2018	5 years/Unlimited miles

* Coverage is calculated from in-service date and zero miles.

This previously Certified vehicle requires a completed Volvo Certification Inspection Checklist along with an oil and filter change (at a minimum). Because Volvo charges only one time for the cost of certification, you will not see a certification fee on your parts statement for this sale.

When entering such a vehicle into the system, simply acquire it and add the certification details. Later, when the unit is sold, simply RDR it in the UCR system.
